# PRAMOD KUMAR BINDHANI

pramodkumarbindhani9@gmail.com | (+91)8456909980

https://github.com/Pramod12e www.linkedin.com/in/pramod-kumar-bindhani-a44399340

## SKILLS

- **Languages:** Java, C, JavaScript
- **Frontend:** HTML, CSS, React.js, Vite, Material UI, Bootstrap, EJS
- **Backend:** Node.js, Express.js, RESTful APIs, Passport.js, Socket.io, WebRTC
- **Databases:** MongoDB, Mongoose, SQL
- **Tools:** Git, GitHub, Render, Cloudinary, Mapbox

## EDUCATION

- Government College of Engineering, Keonjhar | Computer Science Engineering *8.2| 2028*
- Udayanath Autonomous College of Science and Technology, Cuttack|XII (CHCE) *83%| 2023*
- Durga Charan High School, Orasahi |X(HSC) *81%| 2021*

## ACADEMIC PROJECTS

**StayFinder – Full-Stack Property Discovery Platform** | https://github.com/Pramod12e/StayFinder | https://stayfinder-2-14cs.onrender.com/listings/

*Property discovery platform helping users explore, review, and manage accommodation listings with location-based maps and secure accounts.*

- Built and deployed a full-stack listing platform with property CRUD, session-based authentication, reviews and ratings, and ownership-based edit/delete authorization.
- Implemented image upload with Multer and Cloudinary; stored data and sessions in MongoDB Atlas using Mongoose.
- Integrated Mapbox geocoding and interactive maps with dynamic location popups.
- Added location, title, and category search using MongoDB regex and Fuse.js fuzzy search.
- Validated input with Joi, centralized error handling, and secured environment variables.
- Technologies: Node.js, Express.js, MongoDB Atlas, EJS, Passport.js, Cloudinary, Mapbox, Fuse.js, Joi, Render

**Health-Tech Telemedicine Platform** | https://github.com/Pramod12e/Health-Tech/ | https://health-tech-cimc.onrender.com/

*Telehealth bridge giving low-literacy, underserved communities access to medical help.*

- Built and deployed a multilingual telehealth platform connecting patients, doctors, and pharmacies, with role-based authentication and profile management.
- Developed doctor and pharmacy discovery with fuzzy search and location-based results with distance using MongoDB geospatial queries.
- Implemented booking, availability, and prescription workflows with live call alerts.
- Enabled peer-to-peer video consultations for doctor and patient using WebRTC and Socket.io signaling.
- Added an IndexedDB offline queue that syncs bookings and symptom checks when back online so that zero data loss happen .
- Technologies: MERN, React, Vite, Material UI, Node.js, Express.js, MongoDB, WebRTC, Socket.io, IndexedDB, i18next

## CERTIFICATIONS

- **Full-Stack Web Development** – Coursera (Skills: HTML, CSS, JavaScript, Node.js, Express, MongoDB)
- **SQL for Data Management** – Coursera (Skills: Joins, Queries, Database Design)
